### Project Title: Nara Park Microsite

I chose Nara Park as my topic because I love the idea of humans and deer coexisting in a shared natural space. The park represents a peaceful balance between nature and culture a place where history, spirituality, and everyday life meet. I'd like to build this as a multi-page responsive microsite, with clear top navigation and immersive photography.

- **Home Page / Introduction: Introduction of Nara Park:** location in Japan, famous free-roaming deer, unique connections between humans, nature, tradition.
- **History and Cultural Significance:** background on park's origins and connections to ancient temples and shrines. Explanation of how the deer came to be regarded as sacred messengers.
- **Deer and Human Interaction:** The experience of visitors feeding and interacting with the deer, behavior of deers. Tourism, safety, animal welfare.
- **Temples and Landmarks**
  - Tōdai-ji Temple (Great Buddha Hall)
  - Kasuga Taisha Shrine
  - Kōfuku-ji Temple
  - Scenic ponds, gardens, and walking trails
  - Seasons and Nature
